Thin Solid Films, *162* (1988) v–viii

Contents

ELECTRONICS AND OPTICS

Transport properties of tellurium films prepared by hot wall epitaxy 1
I. S. Athwal, J. Kaur and R. K. Bedi (Amritsar, India)

Effects of substrate thermal expansion coefficient on the physical and electrical properties of thick film resistors 7
O. Abe, Y. Taketa and M. Haradome (Chiba-ken, Japan)

A study of annealing effects on deep level profile distributions in GaAs by capacitive methods 13
A. S. Bhuiyan, A. Martinez and D. Esteve (Toulouse, France)

Effect of n^+-polycrystalline silicon rapid thermal annealing on the electrical properties of the gate oxide 21
J. Korec, A. Steffen (Aachen, F.R.G.), G. K. McGinty (Redhill, U.K.) and P. Balk (Aachen, F.R.G.)

Optical and electrical properties of semiconducting rhenium disilicide thin films 29
R. G. Long, M. C. Bost and J. Mahan (Fort Collins, CO, U.S.A.)

Energy barrier height measurements of chemically vapour deposited P_3N_5 films by internal photoinjection 41
Y. Hirota and O. Mikami (Tokyo, Japan)

Implantation damage control of silicon indiffusion during rapid thermal annealing of InP using AlN/Si_3N_4 as an encapsulant 49
J. H. Wilkie and B. J. Sealy (Guildford, U.K.)

Electrical properties of plasma-deposited fluorinated silicon nitride 59
R. E. Livengood and D. W. Hess (Berkeley, CA, U.S.A.)

Research on radiative recombination centre formation in photoconductive cadmium sulphide and selenide films 67
S. V. Svechnikov, G. A. Sukach and E. B. Kaganovich (Kiev, U.S.S.R.)

Low-voltage-driven a.c. thin film electroluminescent cell containing a ZnS:Mn film deposited by molecular beam epitaxy 73
S.-I. Ohta, T. Tadokoro, S. Satou and M. Yokoyama (Niigata, Japan)

Optical properties of native oxides on InP 81
Y. Robach, A. Gagnaire, J. Joseph, E. Bergignat and G. Hollinger (Ecully, France)

Ellipsometric comparisons of rare earth–transition metal alloy films in connection with magneto-optical recording 89
R. Atkinson, R. Gamble, P. F. Gu and P. H. Lissberger (Belfast, U.K.)

Optical analysis of inhomogeneous weakly absorbing thin films by spectroscopic reflectometry: application to carbon films 101
I. Ohlídal and K. Navrátil (Brno, Czechoslovakia)

Electric properties of Ti–Si–N thin cermet films deposited in a triode sputtering system with a hot cathode 111
W. Posadowski (Wroclaw, Poland)

Variations in structural and electrical properties of magnetron-sputtered indium tin oxide films with deposition parameters 119
J. Dutta and S. Ray (Calcutta, India)

METALLURGICAL AND PROTECTIVE COATINGS

Correlation between stress and structure in chemically vapour deposited silicon nitride films 129
A. G. Noskov, E. B. Gorokhov, G. A. Sokolova, E. M. Trukhanov and S. I. Stenin (Novosibirsk, U.S.S.R.)

Evaluation of the wet erosion resistance of sprayed coatings. 145
M. Fukumoto, M. Nakoaka and I. Okane (Aichi, Japan)

Grain boundary diffusion in Ni–Cu multilayer films 155
R. Venos (Regensburg, F.R.G.), W. Pamler (Munich, F.R.G.) and H. Hoffmann (Regensburg, F.R.G.)

The effectiveness of chromium and TiW as diffusion barriers for AuZn/Au contacts in InP junction field effect transistors 161
J. B. Boos, W. Kruppa and N. A. Papanicolaou (Washington, DC, U.S.A.)

Studies of the interaction between aluminium and nickel, chromium and nichrome alloy films 171
A. E. Gershinskii, G. V. Timofeeva and N. A. Shalygina (Novosibirsk, U.S.S.R.)

Characterization of thin iron phosphate films on cold-rolled steel surfaces by transmission electron microscopy and electron diffraction. 183
A. Albu-Yaron (Bet Dagan, Israel) and O. Rabina (Ein Hahoresh, Israel)

Reactions of Co/Mo bilayers and amorphous $Co_{50}Mo_{50}$ alloy films with silicon substrates 199
S. Q. Wang, L. S. Hung and J. W. Mayer (Ithaca, NY, U.S.A.)

Non-conducting polyphenylene oxide electrogeneration on mild steel by different electrochemical methods. 209
T. F. Otero and M. T. Ponce (San Sebastián, Spain)

Absorption and laser damage resistance of TiO_2 thin films deposited on laser-irradiated substrates 217
R. Wolf, B. Steiger, G. Zscherpe (Mittweida, G.D.R.) and D. Schäfer (Berlin, G.D.R.)

PREPARATION AND CHARACTERIZATION

Composition chimique des sulfures natifs formés sur InP par plasma indirect . 223
M. Gendry, J. Durand, L. Cot (Montpellier, France) and G. Hollinger (Villeurbanne, France)

A high resolution transmission electron microscopy study of ZrO_2–CaO films 235
M. Shiojiri, Y. Hirota, T. Isshiki, T. Maeda and S. Sekimoto (Kyoto, Japan)

Effects of heat treating Au/Ni thin film composites in various ambients 247
S. K. Kurinec, I. Toor, Y.-K. Chao, H. Shillingford, P. Holloway (Gainesville, FL, U.S.A.), S. Ray and K. Beckham (Hopewell Junction, NY, U.S.A.)

Fabrication and crystallophysical properties of $(ZnSe)_x(CdTe)_{1-x}(x = 0–1)$ multicomponent system films 257
T. M. Razykov (Tashkent, U.S.S.R.)

Conducting luminescent ZnS films formed by plasma-assisted metal–organic chemical vapour deposition 263
N. G. Patel and A. G. Fischer (Dortmund, F.R.G.)

Low temperature growth of pyrolytic carbon with well-ordered graphite structure by chemical vapour deposition 273
Y. Yoshimoto, T. Suzuki (Nara, Japan), Y. Higashigaki (Chiba, Japan) and S. Nakajima (Nara, Japan)

Microstructural study of carbon black–polyimide thick films 279
U. Rieck and K. H. Norian (Bethelem, PA, U.S.A.)

Partial epitaxial growth of Ni_2Ge and NiGe on Ge(111) 287
Y. F. Hsieh, L. J. Chen (Hsinchu, Taiwan), E. D. Marshall and S. S. Lau (La Jolla, CA, U.S.A.)

Interfacial reactions of palladium thin films on Ge(111) and Ge(001) 295
Y. F. Hsieh and L. J. Chen (Hsinchu, Taiwan)

Preparation of indium tin oxide films by vacuum evaporation 305
Z. Chen, K. Yang and J. Wang

Synthesis and characterization of cordierite-based ceramic thin films 315
M. Bortz and F. S. Ohuchi (Wilmington, DE, U.S.A.)

Characterization of reactively r.f.-sputtered tantalum oxide films 325
Y.-K. Tu, C.-C. Lin (Chung-Li, Taiwan), W.-S. Wang (Taipei, Taiwan) and S.-L. Huang (Hsin-Chu, Taiwan)

LANGMUIR–BLODGETT AND RELATED FILMS

Photovoltaic properties of thin films of plasma-polymerized acrylonitrile . . . 333
A. H. Bhuiyan and S. V. Bhoraskar (Pune, India)

UV light-assisted vacuum deposition of spiropyran compounds 343
T. Yoshida, A. Morinaka and N. Funakoshi (Ibaraki-ken, Japan)

GENERAL FILM BEHAVIOUR

Voltametric behaviour of anodic titanium oxide films close to the hydrogen evolution reaction. 353
R. M. Torresi and C. P. de Pauli (Córdoba, Argentina)

Stresses in thin polycrystalline silicon films 365
V. M. Koleshko, V. F. Belitsky and I. V. Kiryushin (Minsk, U.S.S.R.)

Thermally induced reversible easy axis rotations in permalloy thin films. . . . 375
W. H. G. Horsthuis, K. J. M. Eijkel, R. M. de Ridder and H. Leeuwis (Enschede, The Netherlands)
